“ Seems George only wants people to think about him. But there are survivors Her son AJ her Sister and at least 3 other children. You see George took advantage of Sharon wanting her for himself leaving all the other behind.

I loved her but you came over to the house and instead of training the horses you trained her. You made it so she never saw her son. She could have come back but you wanted a white. I spent thousands to make her happy and you did nothing. She spent her retirement on you you lazy user.
